

IBF IS YOUR COMPETITIVE ADVANTAGE—GET YOU AND YOUR STAFF CERTIFIED TODAY

Demand Planning, Forecasting, and S&OP/IBP Certification

As we move rapidly into the age of Big Data and Analytics, Forecasters and Demand Planners have never been so critical to maintaining market share, nor have they been in such high demand. This role, however, requires certain skills, and employers must be sure their S&OP/IBP professionals possess a fundamental understanding of the knowledge and practical aspects of the field. Certification allows employers to build strong teams, with the specific skills required to deliver serious value to their organization. IBF Certified professionals are more likely to foster change, encourage collaboration and consensus, build relationships, and improve company performance. IBF Certification sets the standard for forecasting & planning excellence, a standard that companies across the globe know and trust. Certification benefits professionals by having their skills formally recognized, with each level of certification representing a milestone in knowledge, allowing professionals to secure career progression.

IBF Certification is the gold standard of forecasting excellence - sign up to get you and your team certified today.

THREE LEVELS OF CERTIFICATION

- 1 Certified Professional Forecaster (CPF)**
Earned by passing exams 1, 2 & 3
- 2 Advanced Certified Professional Forecaster (ACPF).**
After receiving CPF, earned by passing exams 4, 5, & 6
- 3 Certified Professional Forecaster—Candidate (CPF-C).**
A starting point for students as they enter the job market.

TURBO CHARGE YOUR CAREER WITH IBF: *Benefits Of IBF Certification*

BOOKS

Fundamentals of Demand Planning and Forecasting 3RD EDITION

Author: Chaman L. Jain

This is the most comprehensive book written in demand planning and forecasting, covering every major topic a professional needs to know. It discusses not only the different forecasting models in simple terms, but also how to use forecasts effectively in business planning. It covers forecasting and planning processes including Consensus Forecasting; Sales & Operation Planning (S&OP); Collaborative Planning, Forecasting and Replenishment (CPFR); and Integrated Business Planning (IBP). This book is packed with many real-life cases that Demand Planners can expect to encounter throughout their careers. It explains how to sell forecasts to management and gain buy-in for planning resources. It also discusses in detail the key performance indicators that should be used in forecasting and planning. Importantly, it highlights worst practices to avoid that, once addressed, can drive huge improvements.

Predictive Analytics for Business Forecasting & Planning

Author: Eric Wilson, CPF

This groundbreaking book is designed for professionals looking to add value in the new era of demand planning and predictive analytics. In the age of Big Data where companies produce data in ever-increasing amounts, in a variety of formats, and from a multitude of sources, predictive analytics is the competitive differentiator of tomorrow. Eric Wilson introduces you to the predictive analytics techniques, methodologies, and technologies that forecasting, planning and data science professionals can use to turn data into useful insight. This book underscores the critical role that these innovations are playing and how you and your team can leverage them to drive business value. Offering a complete overview of the latest demand planning, business forecasting, and predictive analytics concepts and applications, this book is the perfect guide for professionals who want to improve their skills for Demand Planning 2.0.

Price: \$105.95(USD) + shipping

ELIGIBILITY CRITERIA

There are 3 ways an individual can be eligible for the Certification program.

- 1 The potential candidate must have at least a Bachelor's degree and one year of professional experience in Forecasting and Planning
- 2 If the individual does not have a Bachelor's degree, two years of professional experience in Forecasting and Planning can fulfill the eligibility requirement.
- 3 For students or those new to practicing forecasting and planning, you can earn a CPF-C by passing exams 1-3. Then, once you complete 1 year of professional experience, IBF can upgrade you to full CPF status.

CERTIFICATION FEE:

IBF Members: \$375(USD) per exam

Non-Members: \$425(USD) per exam

CERTIFIED PROFESSIONAL FORECASTER (CPF)

To earn the CPF designation, one must pass exams 1, 2, and 3.

EXAM 1

What You Need To Know About Demand Planning, Forecasting, and S&OP/IBP

- Selecting a Forecasting Package
- Technology Capabilities
- Scalability
- Forecasting System Implementation
- Worst Practices in Forecasting & Demand Planning

EXAM 6

The Role of Artificial Intelligence in Demand Planning & Forecasting

- Types of models and how they are used
- Clustering algorithms & K-means models
- Classifiers, Bayes and Decision Trees
- Types of analytics and their outputs
- Steps to build machine learning algorithms
- Current uses and applications of AI, machine learning, and predictive analytics

"The reason I wanted IBF certification was to give me more knowledge about the forecasting area...It has helped me tremendously, not only with just being knowledgeable about the forecasting and planning area and best practices, but it also helped show other people that I am knowledgeable about what I am doing... It helped me not only to land the job, but get the compensation that I was looking for. Estee Lauder felt, given the fact I took the time to study and get certified meant that I really knew what I was doing. That made me more confident to take on a role and it made me feel I was working for a company that really understood what forecasting was all about"

—**KEYAMMA GARNES**, Director of Demand Planning, **ESTEE LAUDER**

"Whether you are just getting into the vocation or an executive looking to take your Demand Planning to the next level, make sure to pick up this book to ensure your organization is heading in the right direction."

MICHAEL WACHTEL
Vice President of Supply Chain
L'OREAL

"Predictive analytics is the most important business topic of our time, extending an organization's ability to optimize efficiency while improving speed to market. Eric Wilson is one of the industry's top experts with the ability to translate complex topics into simple language. This book is a must for all business innovators and practitioners."

JOE ESCHENBRENNER, ACPF
Director, Demand & Supply Planning
PUMA GROUP
